

28 January 1969

POINT PAPER ON TOD

1. Data call for Phase II triggered by letter from Mr. Nitze of 10 January -- submission due on or about 1 April. As before, DIA tasked with resources in CIP. Similar data being requested from others for other programs.
2. Data Sheets for this call result from info submitted in Phase I which has resulted in specific tailoring of data requested to "Reporting Entities" which are units and activities contained in the CIP.
3. Extends TOD to include data on units and activities from FYs 68 - 74 to make it more compatible with DoD FYDP.
4. Also includes "Force Tabs" for those units or activities having primary installations and/or equipment for collection/processing.
5. Modifies geographic breakout of resources to single out resources in Arab-Israel area and North Korea and North Vietnam.
6. Further mission-orientes resources by asking breakdown into such missions. For example, "Forces Intelligence" (OB) and "Weapons Systems Characteristics" (S&T). Give example.
7. Completion of data sheets will require close work with Services since we do not have info breakout by unit/activity. Will require going to field in most instances. DIACS signed letter for Services requesting their cooperation.
8. As for Phase I, DoD Directorates and offices responsible for review of CIP submissions will be responsible for assembly of TOD data on units and activities under their cognizance.
9. Uses January 1969 FYDP update as common point of departure for breakdown of resources.
10. CIP will use "March update" - OSA(SA) requested to consider.

Data by

1. *Functions - Prod. Coll, MISC etc*
2. *Sensors - Imagery, ELINT -*
3. *Geog Targ - Comm + Non Comm by country*
4. *Subj Targ - Mil or Non Mil by Stat aff, Gen Purp*
5. *Missions - { Forces Intell, Weapon Syst Charact ...
Mr. At Energy, Const Intell as separate missions*
